

ZA-WWW 2011 Conference, 14th to 16th September
University of the Witwatersrand, Johannesburg

Plug In. Debate. Innovate.

13th Annual Conference on WWW Applications

Overview

The success of the international World Wide Web conferences, as organised by the International WWW Conference Committee, prompted the invention of a similar and local series for South African researchers and Web developers. Prof Pieter van Brakel, previous head of the Department of Information and Knowledge Management of the University of Johannesburg (UJ) consequently organised and chaired the 1st South African Annual Conference on World Wide Web Applications, held in 1999. The first international WWW conference was held in 1994 at the Web's birthplace at CERN, Geneva and organised by Robert Cailliau, the person who wrote the first source code for a hypertext system for physicists, of what would eventually become today's World Wide Web.

The overall aim of the South African conferences was to provide academics, researchers and Web developers with an opportunity to describe and discuss novel Internet, Web and intranet applications and developments, and to exchange ideas on applying the Web for teaching and research purposes.

“Creating Conversations”

The outstanding success of this first conference necessitated the arrangement of a second, a third and further events in the years to come. Academics and those from industry were brought together from the wide spectrum of human knowledge - with Web applications as the common denominator.

The month of September is each year set aside for ZA-WWW. The 12 years of conferencing created the opportunity for about 750 authors to present their research. Since 2005 these papers have been peer-reviewed according to the SA Department of Higher Education and Training's

requirements.

The year 2011 marks the 13th event of the Annual Conference on World Wide Web Applications. The 2011 Conference will be hosted by the University of the Witwatersrand's Knowledge and Information Unit in Johannesburg from Wednesday 14th to Friday 16th September. The Conference covers a wide variety of areas from e-Learning and web applications to software development and e-Commerce. ZA-WWW 2011 is about creating conversations around the web that could lead to new insights and developments in the field.

What to expect

*Diversity

*Debate

*Research

*Ideas

*Knowledge

*Conversation

*Innovation

*Engagement

Who you'll meet

*Academics

Prof Lee Berger, Wits Institute for Human Evolution

*Thinkers

Dr Angus Hay

*Students

*Industry professionals

Google
Uniforum
Vodacom
World Wide Worx

*Innovators

Arthur Goldstuck

*Strategists

*Leaders

*Pioneers

Some Topics

*Web Development

*e-Commerce

*e-Learning

*Social Media

*e-Government

*Mobile Web

The ZA-WWW Conference is accredited by the South African Department of Education and The International World-Wide Web Conference Committee (IW3C2)

ZA-WWW 2011 Location

Wits
Business
School

The ZA-WWW 2011 conference will be held at the Wits Business School, in Parktown Johannesburg. The Wits Business School, (WBS) was established in 1968. Until 1992 the school operated as a separate faculty within Wits University. In 1992, the school of Public and Development Management (P&DM) was founded and both WBS and P&DM operated as independent schools within the Faculty of Management. In January 2001 both schools were integrated into the new Faculty of Commerce, Law and Management together with the School of Economic & Business Sciences, the School of Law and the School of Accountancy. The School is entirely postgraduate in nature, but offers an extensive range of certificate and executive programmes to experienced (but not necessarily graduate) executives.

The ZA-WWW 2011 Conference will take place both with the main WBS buildings and the School of Public and Development Management.

Postal Address: P O Box 98, Wits, 2050

Street Address: 2 St David's Place, Parktown

General Telephone: +27 11 717-3600

Call Centre: 0861 000 927

website: <http://www.wbs.ac.za>
